

# CAREER RESOURCE LIBRARY

## WHY IS IT CRITICAL

While a comprehensive learning solution is still best for shifting cultures and changing the way people talk, share, practice, and learn, some learners and cultures demand something different. Whether short learning experiences or just-in-time access to content, tips and tools — CSI has the solution.

## WHAT ARE THEY?

Using some of CSI's most impactful thought-leadership, these career resources are designed to support real-time, real-world and relevant conversations between employees and leaders leading to high engagement, commitment, career growth, performance, and productivity.

To introduce or support your career development or employee engagement initiative, to sustain those efforts, or to jumpstart conversations that engage, develop and retain talent, CSI offers a license to a variety of engaging and impactful content for managers and employees to support them in their respective career development roles. Choose the resources you'd like to license for your organization.

“In the new economy, conversations are the most important form of work. Conversations are the way knowledge workers discover what they know, share it with their colleagues, and in the process, create new knowledge for the organization.”  
 – Alan Webber,  
 Co-Founder, Fast Company
